SUMMARY

Frontend & Full-Stack Engineer with 4+ years of experience building web platforms for municipalities, research institutions and public bodies. Specialised in React.js, TypeScript and Next.js, with full-stack delivery on Node.js, PostgreSQL and PostGIS. Led the move to a monorepo architecture serving 10 municipal installations, re-architected an interoperability platform as a full-stack Next.js application, and contributed to 20+ live deployments across 15+ Greek municipalities. BSc in Computer Science (Artificial Intelligence), PM² Agile certified.

TECHNICAL SKILLS

Frontend & Mobile: React.js (React 19), Next.js (App Router), TypeScript, JavaScript (ES6+), Redux Toolkit, React Router, React Native, HTML5, CSS3, Tailwind CSS, Ant Design, Bootstrap, Vite

Backend & Data: Node.js, Express.js, REST APIs, PostgreSQL, PostGIS, MongoDB, Firebase, SQL, Zod

Maps & Data Visualisation: Leaflet, MapLibre GL, Chart.js, Recharts, GIS

Testing & Quality: Vitest (unit testing), Playwright (end-to-end testing), ESLint

Tools & Workflow: Git, Bitbucket, Jira, Docker, Docker Compose, nginx, Postman, pgAdmin, Keycloak (SSO)

Architecture & Practices: Monorepo and multi-tenant (white-label) architecture, i18n, Agile (PM²), requirements analysis, team coordination, mentoring

AI & Machine Learning: Python, PyTorch, TensorFlow, deep reinforcement learning, world models, CNNs, computer vision

Additional: Vue.js, Quasar, Angular.js, Java, C, C++

PROFESSIONAL EXPERIENCE

DOTSOFT

May 2024 - Present

Senior Developer 2026 - Present

- Led the transition from one codebase per installation to a monorepo architecture (npm workspaces, shared Vite configuration), now serving 10 municipal installations across Sync2myCity, City Events and Act4myCity, delivered under very strict deadlines.
- Redesigned and re-architected the KED interoperability platform end to end as a full-stack Next.js and TypeScript application: PostgreSQL/PostGIS data model, data API for external providers, and Vitest unit and Playwright end-to-end tests.
- Coordinated part of the KED Patras team under a very tight deadline, breaking a complex codebase into well-scoped tasks and presenting the platform at the client review.

Mid-Senior Developer May 2025 - 2026

- Delivered the EKT open data platform (data.ekt.gr) for the National Documentation Centre: a fully custom React 19 interface with no UI library, CKAN API integration and a Node.js proxy layer, setting the approach for later projects.
- Delivered citizen-facing municipal platforms, including a volunteering network (Act4myCity) and real-time seismic monitoring with public alerts (Tremor Watch, Trikala).

Mid-Level Developer May 2024 - May 2025

- Developed and maintained web applications for public bodies, including the Academy of Athens, the Region of Central Macedonia and the Azerbaijan Ministry of Ecology and Natural Resources (FAO).
- Built digital repositories, research centre websites and administration panels with React, Redux Toolkit, Bootstrap and Ant Design, including interactive Leaflet maps.

WEBLOGIC

Sep 2022 - May 2024

Lead Developer Jun 2023 - May 2024

- Led front-end development of three React Native mobile apps (Bus Driver, Bus Passenger, Hotel Booking) with Redux Toolkit.
- Translated customer requirements into scoped tasks, distributed the workload across the team, onboarded and mentored new developers, and owned version control and quality assurance.

Frontend Developer Sep 2022 - May 2024

- Developed a chatbot builder platform for hotels and travel agencies with React, Redux and Bootstrap.
- Built the embeddable chat window widget and its specialised components, translating business requirements into platform updates.

INSTASHOP | **Full Stack Engineer** Jan 2022 - Mar 2022

- Full-stack development and support with Angular.js, Node.js and MongoDB, including legacy project upgrades and customer data management, within an international team.

RENVIS | **Full Stack Intern** Jul 2021 - Sep 2021

- Contributed to a basketball academy management application from design to production with React, Redux, Node.js, Express and PostgreSQL.

SELECTED PROJECTS

- **KED Interoperability Centres** (Municipalities of Patras and Kamena Vourla): municipal dashboards for sensors, environment, mobility, waste and finance. Next.js, TypeScript, PostgreSQL/PostGIS, React, Ant Design, MapLibre, Leaflet, Chart.js
- **Sync2myCity** (Kallithea, Kozani, Konitsa, Pydna): school requests platform and the company's first monorepo. React, Redux Toolkit, React Bootstrap, MapLibre | schools.cityofkozani.gov.gr
- **City Events** (Argostoli, Oropos, Paionia): municipal events portal with ticket booking. React, Redux Toolkit, Ant Design, MapLibre, Keycloak | oropos.city-events.gr
- **Act4myCity** (Veroia, Kalamaria, Central Macedonia): municipal volunteering platform. React, Redux Toolkit, Ant Design | veria.act4my.city
- **EKT Open Data Platform** (National Documentation Centre): custom open data portal over CKAN. React 19, plain CSS, Node.js, CKAN API | data.ekt.gr
- **Also delivered:** Smart City dashboards for live sensor data in 5 municipalities, Tremor Watch seismic monitoring (Trikala), MENR Azerbaijan environmental GIS platform for FAO, Region of Central Macedonia citizen e-services portal, Knossos Palace digital guide, Athens Development (EATA) digital tools programme, TEE Dodecanese heritage repository, Academy of Athens repository and research centre websites, Apokoronas museums portal.
- **Independent work:** End of Dawn band website in four languages with merchandise store (endofdawn.com), Gem Rooms Luxury Apartments website (gemluxury.eu).

EDUCATION

BSc in Computer Science, Aristotle University of Thessaloniki
Specialisations: Artificial Intelligence; Robotic and Autonomous Systems

- **Thesis:** Anomaly Detection in Autonomous Driving Agents Using World Models. A two-tier safety monitor for a DreamerV3 deep reinforcement learning driving agent in the CARLA simulator: a CNN detects obstacles by comparing real and world-model-imagined frames, a KL-divergence monitor flags when the world model no longer fits the scene, and a supervisor brakes progressively.
- Avoided every collision with a parked vehicle in all three test scenarios (75 to 98 per 100 episodes without the monitor), with 0.94 detection recall at 4% false positives, in real time (33 ms per step). Python, PyTorch, TensorFlow, SheepRL, CARLA
- Co-authored a paper on the work with P.-A. Tosidis and A. Tefas (not yet published).

NGB Business Seeds: 14th Innovation and Technology Competition Nov 2023 - Dec 2023

OkThess!: 14th Acceleration Programme Cycle Nov 2021 - Dec 2021

CERTIFICATIONS

- **PM² Agile Certification**, PM² Alliance, Aug 2026 (Certification ID PM202608041418A9202608137230)
- **React - The Complete Guide (incl. Next.js, Redux)**, Udemy / Academind, Jul 2026, 71.5 hours (verify)
- **AI Applications in Business Marketing & Management**, GlobalCert, Dec 2025 (Code GREXPTNB000364)
- **GDPR - General Data Protection Regulation**, Sphynx, Aug 2026 (verify)
- **Cyber Hygiene**, Sphynx, Aug 2026 (verify)

LANGUAGES

Greek: native | **English:** professional working proficiency

INTERESTS

Music (playing and writing), Brazilian Jiu-Jitsu and kickboxing, homebrewing, woodworking and leathercraft
